

# AVIONICS MOUNT SPANNERS FOR ALL 'T' MOUNT STYLES, MAKES & SIZES

## EXCLUSIVELY FROM AEK T SERIES AVIONICS MOUNT SPANNER WRENCHES

AEK Technology's 'T' Mount spanner wrenches are specifically designed for use on 'T' Series and other similar avionics mounts without wrench flats that require 'drill rod' insertion to prevent rotation of the core during installation or removal torque. They also work well on those mounts with both wrench flats and drill rod holes.

These T Mount spanner wrenches eliminate the problem of finding properly sized drill rod stock to use as an anti-rotation tool when installing or removing avionics mounts that have a pre-drilled hole in the core for this purpose.

### AVAILABLE AS INDIVIDUAL WRENCHES OR AS A SET TO FIT THESE MOUNT SERIES AND SIZES

	WRENCH PART NUMBER (COMPLETE SET P/N: 5675-S)
